Foreword

This document serves as a comprehensive guide to the fundamental aspects that define the visual identity of our brand - Awoostria. You will find specifications regarding our Logo and Brand Colors, Typography, Design Elements, Tone and Language.

As we strive to maintain a cohesive brand image, it is essential to adhere to these established guidelines. By doing so, we ensure that every interaction, whether within our organization or with external stakeholders, aligns with the essence of Awoostria.

Brand Core

Awoostria was established in Austria in 2022 as a nonprofit organization dedicated to hosting furry events. Initially started by a small group of friends, Awoostria now hosts a wide range of volunteers. This volunteer-based nature entails a constant need for evaluation and adaptation of our visuals for each instance of application for our online presence or our events.

Mission

At Awoostria, we believe in bringing people together to create unforgettable memories in a welcoming environment.

Values

These set the foundation for all visual and verbal decisions.

- **Be open!** Everyone is welcome to participate in our events, regardless of gender, race, or sexuality.
- **Be kind!** We are committed to ensuring that all attendees feel valued and respected, with zero tolerance for negativity or discrimination.
- **Be supportive!** Accessibility is paramount to us, and we strive to accommodate the needs of all individuals, regardless of ability.
- **Be inclusive!** English serves as our primary language of communication, ensuring that our events are accessible to a diverse audience.
- **Be a community!** We recognize the invaluable contributions of our attendees, acknowledging that our success is rooted in the strength of our community.
- **Have fun!** Ultimately, our goal is to create an atmosphere of joy and excitement, where every participant can let loose and revel in the spirit of Awoostria.

Implementation

To ensure Awoostria's visual identity remains coherent over time, all design work should follow the standards outlined in this document and apply them consistently across digital and on-site materials. The Corporate Identity Document is intended to be reviewed once per year, roughly a month after the conclusion of the respective year's convention, in order to evaluate, adjust or refine elements without replacing the overall identity. This incremental evolution helps maintain familiarity for our audience while allowing the brand to grow naturally with each event cycle.

Brand Governance

Visual assets and design work are subject to initial approval by the GFX Lead, who is responsible for maintaining and evolving the Corporate Identity. Board members provide feedback and final approval on design outputs, particularly for high-visibility materials.

The GFX Department is also responsible for maintaining and updating the Corporate Identity Document, ensuring that changes are aligned with the established identity and properly documented.

Usage Right, Licensing & Intellectual Property

Awoostria uses primarily open-source or freely licensed fonts, imagery, and assets cleared for commercial use. This does not indicate a hard-line stance, but it is highly preferrable. Any use of licensed resources must be reviewed by the board.

Any internally created or externally commissioned design work must follow the same restrictions. Teams or individuals outsourcing artwork or design are responsible for ensuring that all licenses are correctly used and documented, including verifying the font and asset choices of contracted artists or designers.

Character Usage

Characters and character designs not owned by Awoostria (including attendee original characters, external intellectual property, and third-party mascots) are not permitted on official operational or functional materials. This includes signage, lanyards, staff identification, and all operational print or infrastructure-related assets (e.g. registration, front desk, security-ops).

Use of such intellectual property in official contexts is only permitted under a formal agreement or contract granting explicit usage rights, including cases such as cameo appearances or integration of external convention brands or mascots.

Non-identifiable or abstract designs may be considered for decorative or atmospheric use only and require case-by-case approval by the Board, based on recognizability and contextual suitability.

A character design is treated as specific intellectual property (restricted use) if any of the following apply:

- It is recognizable as part of an external franchise, brand, or established property.
- It contains distinctive identifiers strongly associated with an existing character (e.g. signature colors, markings, silhouette, or accessories).
- It is owned, licensed, or publicly attributed to an external individual or organization.
- It functions as a defined persona or branded character (e.g. fursona or mascot identity).
- It is reasonably identifiable by a knowledgeable third party as a specific external work.

Logo and Brand Colors

All logo files can be found within the general asset library of our creative drive.
https://drive.google.com/drive/u/2/folders/1JpqiAcnf33WL1m75X8MgcDBGpj3nXESx

Logo Version

Our logo exists as one base version with three variants:

	
Base Version: Wolf + Awoostria (Text Right-Aligned)	**Variant:** Wolf + Awoostria (Text Below)
	
Variant: Text Only	**Variant:** Wolf Only

- The Logo's colors may be adapted for thematic or contextual use. Textures or images may also be used to overlay the Logo.
- The base vector shapes (Wolf and Text) and the arrangements of these variants must remain unchanged.

Logo Typography (Informational)

- The "Awoostria" logotype uses **TT Norms Extra Black** All Caps with custom modifications employed by the original logo artist.

Size Requirements (Logo)

In general, there are no fixed size restrictions for the logo for digital or layout-based applications with the exception for print:

- Print – Full Logo: Minimum "Awoostria" text height: **11 pt / ~0.4 mm**.
- Print – Wolf Only: Minimum height **10 mm** (including buffer; value pending final print tests).

Color Use

Four base colors are defined for Awoostria:

Name	**Amaranth**	**Shadow Grey (Warm)**	**Carbon Black (Cool)**	**White**
Hex Value	#E44763	#241E20	#18181B	#FFFFFF
RGB	228,71,99	36,30,32	24,24,27	255,255,255
CMYK	0,69,57,11	0,17,11,86	11,11,0,89	0,0,0,0
Hierarchy	Highlight Primary	Background Accent	Background Accent	Highlight Primary

- Social media announcements, website content and other digital media should aim to adhere to these base colors but may deviate in shades.

Additional Colors

Design color choices are in general flexible and can be adapted to the intended design using alternative shades, or even completely different colors, if warranted (e.g. Depending on the current year's theme.)

Reward tier structures are the exception and use the following colors (e.g. Website Achievements)

Name	**Cinnamon Wood**	**Silver**	**Metallic Gold**	**Baby Blue**	**Amaranth**	**Ultra Violet**
Hex Value	#C76F43	#A6A6A6	#CFAC3B	#7DC4E8	#E44763	#8214FF
RGB	199,111,67	166,166,166	207,172,59	125,196,232	228,71,99	130,20,255
CMYK	0,44,66,22	0,0,0,35	0,17,71,19	46,16,0,9	0,69,57,11	49,92,0,0
Hierarchy	Bronze (4)	Silver (3)	Gold (2)	Diamond (1)	Prestige (0)	Prestige-Alt (0)

Typography

Common sense rules apply in regards to style, font weight, capitalization and sizing.

Primary Typefaces

- General Use Cases:
  - Headlines & Important Text: **Montserrat**
  - Body Text: **Calibri**
- Specific Use Cases:
  - Web Content: **Inter** (rsms.me/inter)
  - Internal Documents: **Arial**

The Logotype TT Norms is used exclusively for the Awoostria Logo. It is not permitted to use TT Norms to attempt to recreate or extend the logotype.

When adding supplementary text to the logo (e.g. “Awoostria **2025**”, “Awoostria **Security**”), or recreating the Awoostria text visual use **Montserrat Black**.

Use of Alternative Fonts

The convention uses varying title typefaces to stylize the respective year’s convention theme. These are intended to be used for the theme title only.

In general, other alternative fonts may be used in edge cases where design or functional constraints require them. The use of alternative fonts in designs should be discussed and cleared with the graphics department or board directly.

However, minimizing the number of typefaces across the organization is strongly recommended to maintain visual coherence.

Design Principles

Due to the varying nature of themes and projects a lot of design freedoms are afforded as long as clarity, legibility, appropriate contrast and functional hierarchies are considered.

Overall Design Language

- Tone and Aesthetic should aim to be: **Modern, Minimalist, Clean, Straightforward**
- Communication should be concise and to the point
- Rounded shapes are preferred (e.g. Circles, Rounded corners on boxes)

Artwork Composition

- Commissioned artwork should be framed with DIN format ratios in mind.
- Maintain a minimum 5% safe margin / visual buffer around artwork content edges to prevent important elements from being cut off.
- Exceptions may be made when the artwork intentionally breaks the frame (e.g., characters extending beyond borders).

QR Codes

- QR codes may use any shape or color, provided their readability is tested in the final design context.
- Sufficient contrast and size for reliable scanning need to be ensured.

Print and Production Standards:

Specific requirements of the chosen printing service always take precedence if known.
If no printer specifications are provided the following applies.

Color Profiles

- CMYK workflow; total ink coverage should not exceed **300%** when manually assigning colours (e.g., vector objects, text)
- Fogra 52 for uncoated stock
- Fogra 51 for coated stock
- Embed all fonts and images

Black Usage

- Use Rich Black for large areas of black (e.g., C60 M40 Y40 K100)
- Use Pure Black (K100) for body text or small type to ensure sharp edges

Bleed and Export

- Minimum resolution of **300 dpi** for raster images, with lossless image compression during export
- Include a minimum **3 mm bleed** on all sides
- Export files without crop marks, cutting lines, or other printer indicators (unless specifically requested)
- Preferred export format: **PDF/X-3**

Social Media

Awoostria's main platforms for communication are Telegram, Twitter/X and Instagram.

Social Media Icon / Avatar Usage

- Public-facing social media icons (Telegram, Twitter/X, Instagram) should use the Wolf + Awoostria (Text Below) variant. See "Logo Version" for reference.
- Internal channels have no strict requirements. Departments may personalize their own stylistic variant of the logo

Image Specifications

- sRGB image as JPEG or PNG
- Maximum File size of **2MB** per image (website limitation)
- 8% inner safe margin (based on the shorter side of the document) on all sides for text, logos or other important graphical elements

Aspect Ratio

- **16:9** - 1920x1080 px (Margin 87 px)
- **4:5** - 1080x1350 px (Margin 87 px, with content centered within a 1080×1080 px safe zone)

Telegram supports most aspect ratios, while Twitter/X prefers 16:9 and Instagram favors 4:5. For consistency, the two mentioned aspect ratios are preferred depending on content. To avoid cropping across platforms, all key visual elements must remain within the centered 1080×1080 px safe zone of the 4:5 frame.

Posts and Announcements

Our communication on social platforms is friendly, inclusive, and community-focused. We write in a warm, conversational style, using light-hearted expressions appropriate to our community.

We address our readers directly as "you" from the position of a collective "we".

Structure

Awoostria Announcement should follow a specific pattern, when character limits permit it.

- Formal Announcements should begin with an introductory title sentence
- Informal Announcements may start right with the content
- Short paragraphs for legibility
- Clear calls to action (e.g. "Remember…", "Have a look…")
- Links should be embedded when possible
- Emojis should be used sparingly and context dependent

Tone of Voice / Writing Style

- Friendly and Inclusive, speaking with the community and not at them
- Casual, conversational, enthusiastic
- Employ subtle playful language (e.g. “amazing beans”, “awesome furries”)
- In case of negative news, communicate transparently and honest with a reassuring tone
